Money to Loan.

Local and General

A. Halliday has sold out his business at Champion, and is busy there taking stock prior to turning it over to the purchaser.

Professor Elliott, of Olds, visited our local school on Tuesday morning to complete the arrangements for a Boys' and Girls' Pig Club in this district. A number of boys and girls have given in their names as members, and it is hoped to have a number of young pigs to distribute by the end of next month. Mr. Bray, of the Club, has generously arranged to advance the required amount to purchase those pigs, all of which are to be registered stock. A number of local gentlemen are at the head of affairs, although the general business of the Club will be conducted by the boys and girls themselves.

Owing to the high prices on goods we are obliged to run our business on a Strictly Cash basis.

Tims and Cumings.

Money to Loan on Improved Farm Lands.—A. W. Gordon.

Your Oil Opportunity

IN A REAL GROUND FLOOR PROPOSITION

In order to secure sufficient funds to start our drilling operations we are offering our stock at far below the par value. We absolutely guarantee to raise the price of this stock as soon as our operations start on our leases. You are thus afforded an opportunity to double your money within a short time. Our advice is to buy now while you can at the present price of cents per share.

Our fields are in four fields, including one piece of property in the justly famous Warm Springs Dome. This is proven ground and we should bring in a well there immediately without any difficulty. We will also prospect the Manderson Dome of Wyoming, the Carbonado Dome of Montana and the Clark Fork Dome of Wyoming, as well as a large acreage in proven Kansas fields. Oil from either one of these structures will mean a fortune to our stockholders.

Rheumatic Pains

Are relieved in a few days by taking 30 drops of Mother Seigel's Syrup after meals and on retiring. It dissolves the bone and acid matter in the joints so these deposits can be expelled, thus relieving pain and stiffness. Seigel's Syrup also has a tonic effect. It contains no depurative or strong drugs to kill or mask the pain of rheumatism or lumbago. It removes the cause. 50c. a bottle at druggists.

Sugar Situation in Europe

Before the war England received approximately 1,400,000 long tons of sugar per annum from Germany and neutral sources. She now produces about 750,000 long tons of her sugar and exported 1917 11,000 long tons. The French production in 1917 fell to 210,000 long tons. Before the war Italy produced about 210,000 long tons and imported almost none.

Canadian Pacific Association For National Defence

How the Canadian Railways are Co-operating and Diverting Traffic
to War Commissions

It may be of interest to the Canadian public to know some examples of the way in which their railroads, through the Canadian Pacific Association for National Defence, are exchanging traffic in the interests of efficiency.

In one case the C. P. R. diverted by way of the Soo Line one thousand cars of freight so that the two railroads could compete on the north shore of Lake Superior. These cars passed south from Winona to Minneapolis and by way of Saint Paul to the Great Lakes. They consist chiefly of grain or domestic consumption in Canada.

One hundred cars of freight daily are being diverted from the C. P. R. to Quebec and the same way of the National Transcontinental to Halifax. While there is no saving in mileage, in this, the interest of the country, relieves the C. P. R. of St. John and its classes of export freight more urgently required there.

In Toronto an arrangement was successfully carried out where one hundred and fifty cars of coal eastbound for Montreal were turned over from the C. P. R. to the C. N. R. every day.

The Grand Trunk during the winter months has been diverting one hundred and fifty to two hundred cars of coal per day to the C. P. R. and T. H. & B. in order to lessen the strain on the Grand Trunk from the Niagara frontier to Toronto and other points.

The Grand Trunk has also diverted fifty cars per day to the C. N. R. at Toronto.

In Western Canada the Canadian Northern has on several occasions transferred surplus traffic to the sister railways in the West.

The diameter of the dial of "Big Ben" is 22 feet 6 in.

when you use it as your regular table beverage for a few days.

It so readily proves its own worth in flavor, comfort, convenience and economy that its amazing increase in use is quickly explained upon trial.

"There's a Reason"

Help to Produce Own Food

Grain Growers Should Be Free to Concentrate on Grain Production This Year

Speaking at the first of the series of meetings being held under the auspices of the Alberta Poultry Association, Mr. F. Hedley Auld, deputy minister of agriculture for Saskatchewan, urged poultry breeders in the province to work harder to encourage other citizens to take up poultry raising. Mr. Auld urged that the grain growers of the province should be left free to devote all their time to producing poultry-raising, was a work in which the urban population could enter without any trouble, and with little care, to make a profit. With the urban population producing part of their own food supplies, either through vacant lot gardening, poultry raising, or hog raising where possible, there would be more supplies which could be taken for the allies, who need food.

ALMOST HELPLESS FROM RHEUMATISM

Only Able to Move About on Crutches—Dr. Williams' Pink Pills Restored Activity

Inflammatory rheumatism, acute rheumatism and rheumatic fever are different manifestations of the same thing. It comes on with hardly any warning. The pain is excruciating, and there is a tendency of the disease to attack the heart when it reaches its height.

Any one who has suffered from an attack of inflammatory rheumatism knows that the usual treatment is rest, diet, exercise and medication.

Applications of hot cloths and liniments and internal doses of salicylates to relieve the pain are not enough, as they do not drive the sufferer from the blood and the sufferer is liable to renewed attacks if he stays in cold or damp.

To cure rheumatism so that it will stay cured the rheumatic poison in the blood must be driven out, and the blood made rich and red. When the blood is pure there will be no rheumatism. Dr. Williams' Pink Pills build up the blood, make it rich and pure and in this way cure the most obstinate cases of rheumatism.

Dr. Williams' Pink Pills

are the most effective remedy for rheumatic fever.

He was attacked with rheumatic fever. He was at once taken to a hospital at Marquette, Mich., where he remained for four months with but little or no relief. He then decided to go to Mount Clemens, where he took the baths for three weeks, but still had no relief.

At this time he felt that his case was hopeless, and decided to return home. When he reached home, he found only a few days before the use of a crutch and a cane. One knew he was so stiff that he could not bend it, and most of his joints were straight as a board.

He had to sit in a chair, neither dress nor undress himself,

and had to be helped like a child.

I urged him to try Dr. Williams' Pink Pills and he finally consented.

He took the pills a few weeks when he could limp about, without the crutch, and his appetite greatly improved.

This gave him courage and he continued the use of the pills.

He showed constant improvement, and was able to walk about outside for four months, by which time even symptoms of the trouble had disappeared, and he went to his work in Michigan a cured man.

He is now the neighbor around here and his cure was looked upon as marvelous, for everyone thought that at the best he was doomed to a lifetime of suffering.

It is because they have made such wonderful cures as Mr. Harboff's that Dr. Williams' Pink Pills have a world-wide reputation. They are the only medicine used in thousands and thousands of homes. You can get them pills through any medicine dealer or by mail at 25 cents a box or 2 boxes for \$2.50 from Dr. Williams' Medicine Co., Brockville, Ont.

Big Fur Production

That Alberta will this year have a fur production amounting to between \$10,000,000 and \$15,000,000 is the assertion of A. Simpson of Calgary.

This is a very large output, over

several years, and the production this season is developing an export business unequalled of a few years ago.

It is estimated that 1,000,000 pelts alone will have been shipped out of the province this year before the summer comes and 1,500,000 rats and mink pelts will be sent to the skins as going to England, to be used in lining coats for men in the aviation division, while America vies with England in bidding for the coyotes' hides.

Improvements in Transportation

Returned Soldiers Will Be in Charge of Experienced Officers on Journey Home

In regard to the complaints that have been made as to the incompetent leadership of returning soldiers, the statement is authorized by the militia department that a new system is about to be adopted that should lead to improved conditions of experienced soldiers who will accompany parties of draftees. On their return trip they will have charge of parties of draftees. In view of the fact that the draftees are not in the military service act are being sent to England with very little training it is necessary that they should be put under the charge of officers of the militia who have had a period of military experience and ability and experience. The utilization of these officers in looking after the care of soldiers en route to Canada will serve to put the front exposed to lessened improved conditions on shipboard, and a lessening of complaints on the part of the men in the future. The officers of the headquarters staff see that they are extremely anxious to remove all causes of complaint on the part of the men.

These men from experience

will take the men out of joints and the soreness out of muscles—and it's so convenient. No rubbing required. It quickly penetrates and brings relief. Easy to apply and cleaner than messy plasters or ointments.

Always have a bottle in the house for rheumatic aches, lame backs, and strains.

Generous sized bottles at all drug-gists.

Food or Lid or?

England Should Stop Use of Grain in Distilleries

So long as the consequences only upon themselves it was the exclusive business of the people of Great Britain whether they used the grain to supply the food or wasted it in making whisky. But when the people of Canada and the United States are ordered to put themselves on a rationing system—in order to save England from starvation it became also the legitimate business of the people of Canada to insist upon grain that is supplied to England is used for food or wasted in the manufacture of drink. It would be entirely unfair to the people of Canada and the United States if the governments of Canada and the United States stipulated that the destruction of grain in the distilleries of England must stop.

It is required to burn a acre in order to supply grain to Great Britain.—Edmonton Bulletin.

There is more Cancer in this section of the country than all other diseases put together. Doctors prescribed local remedies and by kindly following the advice of a local disease, greatly influenced by constitutional treatment. Hall's Catarrh, Rheumatism, and Cancer.

Oil of Oregano is a constitutional remedy. It is taken internally and acts through the Blood vessels. A Golden Seal of \$1000 is offered for any good oil of Oregano to cure Cancer.

CUTICURA HEALS PAINFUL ECZEMA

Australian Soldiers Like Hospital Rinks

Anzacs Learn to Skate During Their Convalescence in Canada

The Australian soldiers, like the Canadians, have seen a bit of the world in the military service, and according to the news from the southern Commonwealth, nothing in the way of sport that appeals to them more than the hockey matches they have watched on the Canadian rinks.

At Coburg where a number of them are resting, they have enjoyed the open air rink in connection with the institutions and learned to cut a few curves themselves. The fine exercises of skating surface in Canada are a novelty to them.

Carmen's Messenger

— BY —
HAROLD BINDLOSS

WARD, LOCK & CO., LIMITED
London, Melbourne, and Toronto

(Continued.)

The brakeman grinned, because the hint was plain. It is said on Western roads that men who collect a fare in their coats money at the car roof and accounts to the company for as much as sticks there.

"Well," said the first man, "I guess we'll take our chances and you can get into the caboose. You'll find blankets and a bunk where you can lie down if we take off your boots, we'll dump you somewhere handy for catching the next east-bound."

Foster found the caboose comfortably warm. There was a stove in the middle, and two or three were fixed to the walls. In a few minutes the train they waited for went roaring past, and when the freight train came on, the men gave him some supper. Then he got into a bunk and went to sleep.

He caught the next express going east, and on reaching Ottawa, where he had been told he would expect the man he had helped would come, or send somebody to meet him, though he wore a coat and stood in a conspicuous place, he bought a newspaper. It threw no light on the matter, but a time later he picked up and down, waiting, if he would go to the police. This was perhaps his duty, but it looked as if the owner of the coat he had given away might be a shrewd debtor, and if not it was obvious that he had some reason for keeping his secret. Foster decided to let him do so, and went to choose a comfortable seat in the train.

When he arrived at Montreal he went to the Windsor as he had been told, and sat in the smoking room waiting and none came during the day or two he stayed. On the evening before he sailed he was sitting in a large room with which was a feature American and Canadian scenes, when he thought a man some distance off looked hard at him over his newspaper. He could not see his face, but he held up the paper as if to get a better light and people were passing about between them, but he thought the man was Daly, and after a few moments carelessly crossed the floor.

A man sat at the spot he had marked, and the chair on both sides were unoccupied, but when Foster sat down in the nearest he saw the fellow was a stranger. This puzzled him, since he did not think he had been mistaken. It was, however, possible that Daly had been there, but had moved off quietly when Foster's view was obstructed. If so, he had done so to object to his sitting, and Foster waited some minutes before he went to the office and examined the guest list. Daly's name did not appear, and he could not find anybody from the West had signed the book recently.

"I wanted to see if a man I know is staying here," he told the clerk. "The name all right," said the other. "Quite a number of people have been looking for friends today."

Foster donned his coat as well as he could, and asked if he had examined the book.

"No," said the clerk. "Nobody just like that." Foster regretted it. He was about; but now I think of it, a man who might meet the bill stood by while another looked at the last page. Then he induced a porter to open the revolver door. There! that's who he was with!"

As the man pushed the door round Foster saw his face, and he knew that the stranger who had expected to find Daly. He thanked the clerk and went back thoughtfully to his place because, though as Daly had been there and the other had helped him steal away. If his surmise was correct, they might be trying to get Foster to help him. He was, fortunately, out of their reach, and Foster decided that he must not exaggerate the importance of the matter. He left after his coat came to Montreal on business, and the rotunda of a Canadian hotel is something of a public resort. Still, he felt disturbed and presently gave the address for a man telling him to deliver it when asked. He felt it a relief to get rid of the thing.

Next day he sailed on an Empress liner, and on the evening after he

reached England left the train at a lonely station in the north. It was not yet dark, and for a moment or two he stood on the platform looking around. It had been rain, and the air had a dampness which was unusual in Canada. In the east and north the sky was covered with low clouds, against which rounded hills tops were faintly marked. Rugged moors rolled in long slopes toward the west, where the horizon was flushed with vivid saffron and delicate green. Up the valley, in the foreground ran a deep valley, with blue shadows in its bottom and patches of orange light on its healthy sides. The sky was clear, though a line of black firs ran boldly to the crest of a neighboring ridge, and stone dykes were more common than ploughed land, and nothing but a steep, rocky hillside. Foster saw the sheepherder grow to the peaty soil, which looked black as jet where the railway cutting pierced it.

While he looked about a man came up. He was elderly and dressed in extreme neatness, in old-fashioned clothing, and had an unmistakable look of a gentleman's servant. Though there was a small car in the road, he was obviously not a chauffeur.

"You'll be Mr. Foster, sir, for the Garth?" he said.

Foster said he was, and the man responded, "Mr. Featherstone is here, sir, and his car and his chauffeur. He had to attend the court, being a magistrate, and hoped you would excuse his not coming."

"I suppose I ought to have remembered that," Foster agreed smiling.

"As you like, sir, but it's perhaps not quite usual in this country," the other answered in a deprecating manner.

"I suppose I ought to have remembered that," Foster agreed smiling.

"They crossed the platform, and while they waited for the bag he made said respectfully, "Might I ask if Mr. Lawrence was better when you left, sir? It was a disappointment to

NURSING THE WOUNDED

It takes strength and courage to nurse the wounded, but the call to serve herself fit for war's call at home or abroad. Health and strength are within the reach of every woman. Take this medicine, and there's a safe and certain remedy for the chronic weakness, debility, and disease, which tends to render a woman strong, robust, and invigorates every "run-down" or delicate woman. It satisfies the natural functions.

If you're a tired or afflicted woman,

take Favorite Prescription, and there's a safe and certain remedy for the chronic weakness, debility, and disease, which tends to render a woman strong, robust, and invigorates every "run-down" or delicate woman. It satisfies the natural functions.

The Best Farm or Ranch Car

YOU would replace your "general utility" team with a powerful, sturdy, Ford car at once, we believe, if you but figured the matter out carefully.

The Ford is especially suited to western conditions and your needs. It is equal to rough roads, big loads and long distances. These are the very tests to which you will put your car.

A Ford will run your errands for repairs, grease, mail and countless other necessities quickly and cheaply. It will save you weeks of time and money. It will be one of your best investments. It will make prairie life more enjoyable. You need a car and need it badly. The Ford is the utility car for the Western Farmer.

Our Allies Must Be Fed

DESPITE war conditions, we have not as yet felt the pinch of hunger in Canada. Consequently, it is difficult for us to realize the grave need for increased food production in order that others may be fed. At no time is Europe self-supporting in the matter of food. After nearly four years of war, our Allies are living from hand to mouth, depending entirely on the safe arrival of food ships from across the Atlantic.

Because of our comparative nearness to our Allies, and because of our wide, fertile areas, this continent must continue to feed Europe. If we fail, hundreds of thousands of people may starve and our armies be denied a conclusive victory.

A bumper crop, a record harvest and increased meat production in Canada will be worth the winning of many battles to the Empire and our Allies at this critical period.

Increased Production Imperative

Canada must raise for export at least 250,000,000 bushels of wheat more in 1918 than in 1917, to enable the Allies to maintain even their present restricted rations.

They shall NOT starve! — make that your slogan.

Plans have been formulated which, on the authority of The Director of Agricultural Labor, positively ensure that labor will be provided

when needed, to harvest the maximum crop. Authorities agree that the world-wide shortage of food will continue for years after the war. The farmer is assured a ready and profitable market for all the grain and meat that he can produce.

The Empire depends on the Canadian Farmer to "carry on."

CANADA FOOD BOARD

Henry W. Gordon

Chairman

Local and General

Art Sackett has moved on to the farm he recently purchased a few miles east of town.

Crossfield Meat Market shipped a car of choice grain fed Steers to Calgary this week. They averaged around 1300 lbs., one steer weighed 1590 lbs. purchased from Corkill and Gunn.

CHURCH OF THE ASCENSION. 2nd Sunday after Easter, April 14.

10 a.m. Sunday School.

ROSY CHEEKS or HEALTHY COLOR indicates Iron in the Blood. Take a few more drops than necessary. A condition which will be more helped by CARTER'S IRON PILLS

Not Wanted in Canada

Knighthoods are not to be despised and, if given with care and for merit, are not incompatible with our democracy. But for the sake of common sense, a man is responsible for what the institution stands for even though he is conferring them upon others. The Dick and Hare who happen to have been presented with hereditary titles, whether or not they are responsible for them should be plainly told that they are not wanted in Canada.—Ottawa Journal.

The Worm of All

The trouble, as a friend remarked to us the other day, is that there are too many brainless days.—Philadelphia Enquirer.

Miller's Worm Powders do not need after-haste of castor oil or any purgative to complete their thoroughness, because they are thorough in themselves. One dose of them, and they will be found palatable, and will remove the worm trouble by making the stomach and bowels untenable to the parasites. And not only this, but the powder will be certain most beneficial influences in the digestive organs.

WEATHER

HARD ON BABY

The stormy, blustery weather which has characterized March is extremely hard on children. Conditions make it necessary for the mother to keep the house warm. They are often exposed to overheated rooms, to visit relatives and catch colds which rack their whole system. To guard against this, a box of Baby Owl Tablets should be in the house. An occasional dose given the baby to keep his stomach and bowels working regularly, will not fail to break colds and keep the health of the baby in good condition till the brighter days come along. The Tablets are sold by medicine dealers or by mail at 25 cents a box from the Dr. Williams Medicine Co., Brooklyn, N.Y.

Great Head Work

"What was the secret of Wyse's success as a bill collector?" asked the boy. "When a debtor tells him to call the next day for four, he calls at three and catches him in."

"What did you get out of that will case?" asked the first lawyer.

"One hundred and fifty thousand dollars," said the second lawyer.

"Good round sum, eh?"

"Yes, but I thought the old man left more than that."—Boston Transcript.

A POWERFUL AID
When you feel sluggish and nervous, tired and indifferent, you have the first symptoms of declining strength and your system positively needs the special nutritive food-tonic in

SCOTT'S EMULSION

To replenish your blood power, enliven its circulation and bring back the snap and elasticity of good health. Scott's Emulsion supplies Nature with the correct building-food which is better than any drug, pills or alcoholic mixtures.

Scott & Sons, Toronto, Ont.

A Dangerous Leaflet

Leaflets are in circulation all over Germany containing the following extract from the recently suppressed newspaper of Vorwärts:

"Many people are dying of sheer hunger. Sixty million people are starving silent. Germany is the world of a catastrophe whose like Russia has never known. A German defeat and the loss of the whole war.

Any person found possessing a copy of the leaflet is liable to arrest and a heavy sentence of imprisonment.

**Eczema Cured
Five Years Ago**

A Treatment Which Has Proven a Wonderful Healer of the Skin — Certified Evidence of Lasting Cure

The old notion that eczema is a disease of the skin is refuted time and again by the facts that act daily being effected by Dr. Chase's Ointment.

No matter what the cause may be, if you apply Dr. Chase's Ointment regularly you will obtain relief and cure of eczema. Here is the proof:

Mr. Stephen G. Thwaites, 265 Dundas, Ont., writes: "My brother had a bad case of eczema on his legs. He was troubled nearly all one winter and spring, and did not stop for days at a time. He tried different salves and ointments—but nothing relieved him. One day he tried Dr. Chase's Ointment, and it gave him instant relief. He discontinued its use, but had not quite finished the second box when he was cured. It is now about five years since I last used it."

I have no doubt that you can easily recommend Dr. Chase's Ointment, and are very grateful for my brother's cure."

Rev. S. C. Coffman, Vineland, Ont., states: "This is to certify that I know Mrs. Thwaites and the party to whom she refers, and her statement is correct."

J. J. Jones, 223 University Avenue, Kingston, Ont., writes: "I had eczema in my hand for about five years, but found a great many remedies, but found none that would stop it, none cured it permanently. Finally I tried Dr. Chase's Ointment, and in six weeks was completely cured. I could not do without a box of Dr. Chase's Ointment in the house if it cost \$2 a box. I am giving my name to you so that it may help those who still suffer."

"It is too bad," sympathized the friend. "Which one was it?"

"That very pretty one I smuggled through last spring."—Pittsburgh Chronicle-Telegraph.

Doom of King Alcohol

When Every Grog Shop in the Country Is Closed Forever

Some months ago, we wrote that every cheap grog shop in the country is closed forever. How this will add to the gains of the world! The grog shop will be richer at the close of every year, as it is now by more than \$1,000,000,000, which is now expended for whisky. With the world saved, how the confidence of business will be increased! Their poverty will be translated to competence, their houses made hygienic and comfortable, their families scientific and well educated. For them and their children will be comforted, and the unmitigated sorrows of their wives and children will be comforted. The present time will be relieved more than half their inmates, the insane will be cured, and feeble children will come into the world with defective minds and bodies. The world will then take a mighty leap forward into "the good time coming."—Los Angeles Times.

YES! LIFT A CORN OFF WITHOUT PAIN!

Cincinnati man tells how to dry up corns so easily so it lifts off with finger.

You corn-esterred men and women need suffer no longer. Wear the shoes that nearly kill you before, says Dr. W. E. Smith, Cincinnati, after a few drops of freezer applied directly on a tender, aching corn or callus stops soreness at once and soon the corn or hardened callus loosens so it can be lifted off, root and all, with out pain.

A small bottle of freezer costs very little at any drug store, but will poison the feet of everyone, or corn or callus. This should be tried, as it is inexpensive and is said not to irritate. It is also said to be safe, as it is non-sedative, non-anesthetic, and in the course of treatment no preparation has done so effective work, as can be done to thousands.

It Might Be True

Proverbial inability of the British to understand American speech was demonstrated anew at Newport Harbor recently when Arctic Baker, in an inspection tour, got lost from one camp to another he had to cross

an iniquitous mud flat. "I'm afraid," he declared, "if we had proper ammunition for our guns," he said, "we could shoot down all the shells supplied to that particular submarine were filled with sand and iron."—N.Y. Times.

One of these "dad" projectiles actually struck the patrol vessel near the boiler, and would certainly have exploded had not the U-boat captain could, or would, not, offer any explanation of the mystery; but it was obviously either a case of gross negligence on the part of the German dockyard authorities.

You get real action on a bad corn with a sharp needle with a top or two of Putnam's Extincto, and once the corn, all shrivelled up, feels right off the foot, too.

"The secret of war," was the Britisher. "Don't mention it," said the American. Then the British wiggled once more. "You may trust us. The master will be kept in the dark," he said. "The Argonaut,"

No surgical operation is necessary in removing corns if Holloway's Corn Cure is used.

"You simply cannot distrust anybody. Everyone seems to do the same," declared Mrs. M. E. Stead, 26 maid, in whom I had the utmost confidence, left me suddenly yesterday and took with her my beautiful pearl necklace.

"It's too bad," sympathized the friend. "Which one was it?"

"That very pretty one I smuggled through last spring."—Pittsburgh Chronicle-Telegraph.

HOW MRS. BOYD AVOIDED AN OPERATION

Canton, Ohio.—"I suffered from a female trouble which caused me much suffering, and two doctors decided to operate on me. I refused to go through an operation before submitting to an operation, however. I tried various home remedies, such as fomentations, so I can do my house work without any difficulty. I advise any woman who has been helped by Lydia Pinkham's Vegetable Compound to use it. Lydia Pinkham's Vegetable Compound is a compound of a trial and it will do as much for them."—Mrs. MARIE BOYD, 1421 5th St., N.E., Canton, Ohio.

Sometimes there are serious conditions where a hospitalization is the only alternative, but on the other hand so many women have been helped by Lydia Pinkham's Vegetable Compound, after doctors have said that an operation was necessary, that I would advise you to avoid an operation should give it a fair trial before submitting to such a trying ordeal.

For further information, write to Lydia

Pinkham Medicine Co., Lynn, Mass., for advice. The result of many years experience is at your service.

A Valuable Pamphlet

In order that intending settlers in Western Canada may be properly informed as to the system of government, with which officials in the country, the Canadian Pacific Railway has just issued through its department of colonization and development a pamphlet entitled "Canada's System of Government" which explains in very simple language the general principles of municipal, provincial and dominion governments, as they are now in operation in this country. The pamphlet may be had without charge by addressing Robert J. Stead, Department of Colonization and Development, Canadian Pacific Railways, Calgary, Alberta.

The Alberta FarmerThe Weekly Edition of
THE CALGARY HERALD

A Big, Clean, Wholesome farm newspaper, political-
ly independent, giving you every week the latest
war news, the latest and most authentic reports on
local and world markets, timely farm topics, livestock
information from the principal centres, theatrical news,
short stories by famous authors, a home magazine
page, a page for mothers and little ones.

Here to many is an old friend under a new name. But as
representative of the farmer in Alberta, has this farm friend
journal become, we believe that our new name "The Alberta
Farmer" will more definitely indicate the principles and interests
which in The Calgary Weekly Herald we have been privileged
to advocate and support for the last thirty-four years.

By Order of the Village Council,
51-52. W. McRory, Sec.-Treas.

Land Wanted.

I have buyers for from a Quarter
to a Section of Good Improved Land.
What have you to sell. Particulars
to E. Nunneley, 224 8th Ave. W.,
Calgary. Phone M. 6333.

**MAKE MONEY
WITH US****Standard Drilling Rigs Now Ready to
Pound Their Way Into The Oil Sands****Warm Springs—Wyoming**

Already one of the big producing fields of Wyoming. Eight wells have been completed and fortunate stockholders are drawing big dividends every month in the year. This is a "showman's field" and the drilling cost is at a minimum. The production turns from the Van Duzen Oil Co. was able to secure a valuable lease on this situation. At least a dozen companies are now drilling towards the oil producing sands in the Warm Springs Dome and we do not expect to lose much time in starting our operations there. Remember this is a producing field.

Sundance-Upton Fields—Wyoming

We were in this field before the boom started and have 6,000 acres under lease on the very apex of the structure. This done bids fair to be one of the best fields in Wyoming and our large acreage will always make us the big company of this field. We have one rig spotted in this field.

Salt Creek—Wyoming

This is the most consistent oil producing field in all the world, and although the field is but five years old, it has made more wealth than any of the big fields of Wyoming. The wide-awake men who are at the head of this company have secured 320 acres of land less than a half mile from one of the largest gushers in the field. One 500 barrel well in this field at \$1.00 per barrel would mean more than 20 cents per annum on the total capitalization of the Van Duzen Oil Co. We have room for 64 wells on this property.

The Crazy Woman's Pocket—Montana

This dome has been recognized by many geologists to be the most perfect structure for an oil reservoir in all of America. Two other companies have wells in the process of completion on this dome, and it is understood that one of them has already encountered an oil producing sand. The Van Duzen Oil Co. has secured 500 acres of leased land just west of the town between the two wells now drilling. Our optimism is now in the course of construction. When this field is proven it will be the first producing field in Montana. Boom prices will prevail and our stock is sure to go sky high.

Powder River Junction—Wyoming

We have a one-third locator's interest in three one-quarter sections lying within a quarter of a mile from a well now being drilled by the famous Ohio Oil Co. This dome is looked upon as being one of the coming fields of the state. Shallow drilling and its proximity to rail transportation will make this field a big dividend payer.

ANNOUNCING A NEW**CHEVROLET**

MODEL T-4-A

"Baby Grand" Touring Car

THE demand for Chevrolet performance in a larger and more powerful car is met by the Baby Grand Touring Car. Chevrolet engineers have, in this car, perfected many new features that give it a quick get-away, surplus power on hills, and reliability under all road conditions.

On account of its power, flexibility, comfort and easy clutch, this model appeals to lady drivers. The car is extremely well finished, nicely appointed and fully equipped.

EXCLUSIVE FEATURES

37 H.P. 4 cylinder valve-in-head motor; extremely powerful, smooth, flexible and quiet.

Cooling—Water circulated by centrifugal pump through large honeycomb radiator.

Drive—Concave type, extremely easy to operate.

Brakes—Positive in action and easily operated.

Ignition—Removable.
